

EU REACH SVHC-174 declaration

Dear Customers:

This declaration concerns European Union's REACH regulation No.1907/2006 of 18 December 2006. REACH regulation is on Registration, Evaluation, Authorization and Restriction of Chemicals. It entered into force on 1st June 2007 to streamline and improve the former legislative framework on chemicals of the European Union (EU). REACH places greater responsibility on industry to manage the risks that chemicals may pose to the health and the environment.

EOS Power India Pvt. Ltd. has thoroughly reviewed the requirements of the REACH Directive, and the guidance documents (<http://echa.europa.eu/web/guest/support/guidance-on-reach-and-clp-implementation>) released by the European Chemicals Agency to date on implementation of this regulation. EOS Power India Pvt. Ltd. fulfills the role of an Article Supplier (see definition below). As such we have an obligation to report the presence of any Substances of Very High Concern (SVHC) in a concentration above 0.1% (w/w) in articles which we import, or distribute in the EU.

Following this review and based on the reports from sampled suppliers, it was concluded that none of our products intentionally releases substances to the environment and no exposure to humans or the environment during normal or reasonably foreseeable conditions of use including disposal, therefore there is no requirement for EOS Power to 'Register substances'. EOS has not carried out any testing of the products to verify the statements made by our supplier.

As of the date of this document, EOS Power India Pvt. Ltd., has no knowledge of the presence of any Substances of Very High Concern¹ in a concentration above 0.1% (W/W) and all substances as described in Annex XVII, §67, and for all the products or in packaging used to protect the products during shipment, except as indicated otherwise.

Definitions:

Article Supplier: An article supplier is a company which produces, imports, or distributes articles and/or places them on the EU market

Article: Article means an object which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition.
