

Launch of the World's Smallest 225 Watt Power Supply during electronica Munich 2014

December 2014 - Mumbai, India—The world's smallest 225 Watt Power Supply, with a height of only 1 inch, was launched during electronica Munich 2014.

EOS Power would like to thank all the visitors of electronica 2014 for the large interest and positive feedback we received presenting our Power Portfolio.

With its new (M)WLP Series (available now in 225 Watt and 350 Watt versions) EOS Power returns to its roots as one of the most innovative, leading edge designer and manufacturer of ultra-miniature Power Conversion Products.
